

# Airplay

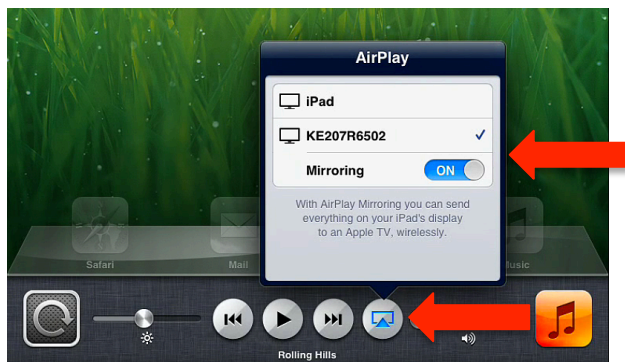

## Tutorial for Mobile-Usability Test

### Step 1: Download and Setup

- Download the setup-file from [http://www.chip.de/downloads/AirServer-fuer-Mac-OS\\_55764808.html](http://www.chip.de/downloads/AirServer-fuer-Mac-OS_55764808.html)
- Install Airserver and verify your license (you can temporarily get a free key by registering your e-mail address)

### Step 2: Mirroring

- Start the Airserver
- Make sure your computer and iPad are connected to the same WI-FI network

- Double-click the home-button on your iPad and scroll left until you find the AirPlay icon. Touch the icon, select the computer you want to stream your screen to (in this case KE207R6502) and turn Mirroring on
- Now your iPad should stream its screen directly to your computer
